Aquatic Ecosystems. As in land biomes, aquatic ecosystems have certain set factors that define them. In this unit, students will be able to classify aquatic ecosystems based on their nutrient availability, salinity, and available sunlight. Both aquatic ecosystems and freshwater ecosystems are included.

BIOLOGY Study Guide CH 4 Ecosystems & Communities

Aquatic ecosystems are any water-based environment in which plants and animals interact with the chemical and physical features of the aquatic environment. Aquatic ecosystems are generally divided into two types --the marine ecosystem and the freshwater ecosystem. The largest water ecosystem is the marine ecosystem, covering over 70 percent of the earth's surface.
