Unbalanced Forces

Physics

The most critical question in deciding how an object will move is to ask are the individual forces that act upon balanced or unbalanced? The manner in which objects will move is determined by the answer to this question. Unbalanced forces will cause objects to change their state of motion and a

Unbalanced Forces | Forces & Motion | Physics ...

A force where two forces acting in opposing directions on a body, are not equal in magnitude and in size, is known as an unbalanced force. In an unbalanced force, a body changes its position i.e. we can observe a moving object changing its direction, either increasing the speed or
