This is a basic freshman level lab where students learn to focus a light microscope. They examine a slide with the letter e, common things, like dust, and a prepared slide with threads to illustrate depth perception. This page shows the answers to the observations students make during the lab and sample pictures of common items as viewed under a microscope.

Prepared microscope slide of a whitefish embryo; Observations. When observing the onion root tip cells for the stage of prophase, the cells took on a brick-like structure and within the cells, small dots (the nuclei) can be seen. In one particular cell's nucleus, the chromatin has condensed so much that it can be seen using a light microscope.
