Featured Research. The Global Climate Misinformation Network. This project aims at a three year global study of national and international efforts to obstruct climate action through the promulgation of misinformation, by 1) conducting a census of the key organizations involved in each country, 2) analyzing the relationships between these organizations, 3) detailing the funding of these ...

Climate Change Solutions | Social Scientists | CSSN

Combating climate change requires a wide range of strategies—advocating for legislation, launching social enterprises, raising awareness—all of which are vitally important. Unfortunately, solutions led by the communities most affected by climate change are often the most overlooked.

Support Local Climate Change Solutions | GlobalGiving ...

The Global Adaptation Network (GAN) is helping the world to build resilience towards climate change by spreading adaptation knowledge. A growing number of organisations and research institutes are hastily assessing how humanity can best prepare for increasing climatic extremes.

Welcome to Global Adaptation Network (GAN) | Global ...

Climate change is a global emergency that goes beyond national borders. It is an issue that requires coordinated solutions at all levels and international cooperation to help countries move toward ...

Climate Action | United Nations

In the most comprehensive report on effective climate solutions, Project Drawdown named educating girls as the #6 most impactful solution (for reference, composting is #60, and rooftop solar is #10). That's because women with more years of education have fewer children, and therefore a lower carbon footprint.

How to Stop Global Warming: The 8 Best Solutions

On October 27 and 28, SDSN hosted its second edition of the Global Solutions Forum, a global event focused on the most innovative solutions coming from our national and regional networks. The 2020 edition presented a variety of locally sourced solutions from eight of SDSN's 40 National and Regional Networks.

Sustainable Development Solutions Network

Climate Footprint Verification - Traditional carbon footprints reflect only a small part of the climate change story. Stabilizing the climate in the critical near-term, and ultimately restoring the Earth to full climate health, requires a more complete understanding of the full range of factors contributing to the problem. Find out more.
