practice it daily. Students cannot "cram" in the memory work two weeks before proofing and expect to gain true mastery of the material. If a student masters each week's memory work along the way, then the Memory Master process is much easier. The younger the child, the more time and energy mom or dad will need to invest.

Guide To Memory Mastery By Harry Lorayne

For a Dynamic Array the Erase function DeAllocates memory. That is, it deletes the array. If you want to use it again you must use ReDim to Allocate memory. Let's have a look an example for the static array. This example is the same as the ArrayLoops example in the last section with one difference - we use Erase after setting the values.
