Heat and Mass Transfer - Tufts

Acces PDF Heat And Mass Transfer By **University**

Heat and mass transfer both are the form of energy transfer. Heat is transferred as a result of temperature difference by conduction, convection and radiation. Mass is transferred by absorption, adsorption, stream mainly as a result of density and pressure difference.

Mass transfer is often coupled to additional transport processes, for instance in industrial cooling towers. These towers couple heat transfer to mass transfer by allowing hot water to flow in contact with air. The water is cooled by expelling some of its content in the form of water vapour.
