Sharp Images ...

Manual focus is best for this, as you have complete control of where you place of the focal point. Start at either the front of the image or the back, and move through the frame. You can leave out a distracting or unattractive background. After you have taken the images, you need to review them to ensure a sharp focus throughout.

Better than Auto Focus

In the field of photography, a manual focus camera is one in which the user has to adjust the focus of the lens by hand. Before the advent of autofocus, all cameras had manually adjusted focusing; thus, the term is a retronym. The focus itself may be adjusted in a variety of ways.
