Where To Download Paper Airplanes That Fly Far

right corner toward the middle of the rectangular paper and then flatten it.

Make a Paper Airplane That Flies Fast and Far < Wonder How To

Planes that push a lot of air, like your hand did when it was facing the side, are said to have a lot of "drag," or resistance, to moving through the air. If you want your plane to fly as far as possible, you want a plane with as little drag as possible. A second force that planes need to overcome is "gravity."
