Johnson pays particular attention to the personality changes and the problems of disorientation he experienced.

### **Right Hemisphere Stroke | Wayne State University Press**

Hemineglect is most prominent and lasts longer when a stroke damages the right side of the brain. However, damage may also occur on the left side of the brain, resulting in hemineglect on the right side of the body. As a matter of course, medical professionals test stroke patients to determine whether they are suffering from hemineglect.
