m = n — svd (A,'econ') is equivalent to svd (A). m < n — Only the first m columns of V are computed, and S is m -by- m. The economy-size decomposition removes extra rows or columns of zeros from the diagonal matrix of singular values, S, along with the columns in either U or V that multiply those zeros in the expression A = U*S*V'.

Singular value decomposition - MATLAB svd

The rifle has a manual, two-position gas regulator. A gas regulator meters the portion of the combustion gases fed into the action in order to cycle the weapon and sets the recoil velocity of the gas-piston system. The gas regulator can be set with the help of the rim of a cartridge.
