with a new and
fascinating discovery :

There is a natural
tendency toward
instability “woven in
the fabric of our world”
which explains why
catastrophes, both
natural and human,
happen.

The real ubiquity is
complexity itself Let's

Download Free Ubiquity Why Catastrophes

begin with a counter-thesis, namely that the "ubiquity" found in simplistic computer models ("games") which are then related to real world systems such as earthquakes, sandpiles, the stock market, political and social history, etc., may be an artificiality and a whole lot less significant than Buchanan supposes.

Experts have never been able to explain the causes of any of these disasters. Now scientists have discovered that these seemingly unrelated cataclysms, both natural and human, almost certainly all happen for one fundamental reason. More than that, there is not and never will be any way to predict them.
